David Bowie

Manager Technology

publicis sapient

SUMMARY

David Bowie is a Manager of Technology in Sapient's Chicago office. He joined sapient in 2002 and has worked on several projects that encompassed the full software development lifecycle. As a result of this work, he has valuable experience in defining, designing, implementing, and maintaining data-driven, object-oriented and service-based enterprise systems. In addition to his industry and technical expertise, David also has proven skills in process redesign and in the management of successful teams, both onshore and offshore.

The majority of David's experience has been in the financial services industry. Specifically, David has worked on projects in the energy trading, mortgage lending and insurance arenas. Most recently, David worked with a top-10 hedge fund to deliver several strategic initiatives aimed at improving their day-to-day operations. Prior to that, David worked with a top-10 mortgage lender to streamline business processes and design a new loan origination system and product and pricing engine. Before that, he played a critical role in the design and development of a sales force automation tool for three separate lines of business at a national commercial insurance company. At another large insurer, he worked to redesign the processes governing their data migration strategy. Before joining Sapient, David mainly worked on projects in the life sciences and energy services industries. He holds a bachelor's degree in Computer Engineering from the University of Michigan.

WORK EXPERIENCE

Publicis Sapient	July 2015 To Present

Mortgage Process Redesign- Architect

Description :The Mortgage Process Redesign was a long-term initiative to provide offshore support for the IT Operations of a one of the reputed European bank.
David worked with a distributed team of 21 people in India to deliver several key initiatives that dramatically reduced the cost of IT support for our client. As the only onshore member of the team,

Role & Responsibilities: David' role was to coordinate all of the team's activities, manage the client relationship, provide quality reviews for the team, and deliver on his own tactical initiatives.
